ETC Upgrades

If your lighting or rigging system is 20, 15, 10, or even five years old, it is ready for ETC Upgrades. ETC Upgrades is a cost-conscious program that can help you update your theater, studio, or worship spaces.

Existing ETC customers: Experience a full upgrade of your Sensor® dimming systems, along with an ETC factory reconditioning that carries a new three- or five-year full warranty.

New customers: Get an affordable way to future-proof your venue's lighting and rigging systems.

Learn more about ETC Upgrades at www.etconnect.com/ETCUpgrades

How it works

An ETC professional will work with you to assess your current system, and recommend a package that can include: dimmer rack improvements and/or lighting-control and rigging-system upgrades. After purchase, an ETC project manager and service provider will help coordinate the installation or maintenance at a time convenient for you.

What it includes

- The latest in lighting and rigging technology, capturing huge advancements in energy savings and safety.
- Easy and efficient control of moving lights and LEDs, and automated rigging control of scenery and lighting positions, in a system perfect for beginners, volunteers and professionals.
- For existing Sensor customers: We will clean, upgrade and recommission it to factory specifications, and provide a new three-year ETC factory warranty for the entire rack. An optional five-year warranty with full rack coverage is also available.

Benefits for you

- *Minimal downtime* - Most Sensor racks can be upgraded within a day.
- *Minimal mess* - This is a system upgrade, not a construction project! It's fast and within your control.
- *A friendly budget* - We'll price your equipment package to fit your maintenance budget.
- *Extended service life* - You can count on ETC's industry-leading, 24/7/365 service throughout the life of your products, with renewed and new warranty coverage added in.
